

What Was it Like to Work on the Space Shuttle: The Misadventures of a Space Cadet

Gregory N. Cecil, M.A.S., a Florida State Certified Educator, Nationally Certified Aerospace Technician, and former Senior Aerocomposite Technician for the Space Shuttle Fleet has an entertaining 45 minute presentation with a follow-up Q&A period describing his experiences working in the Space Shuttle Program from a technician's point of view.

This presentation was created to present to civic groups, schools (5th grade and up), and museums on what it was like to be involved in and to work in Human Space Flight, specifically the Space Shuttle Program.
